2 DAVID: Newman Control, this is David.

3 RYAN: Yeah, this is, ah, Ryan, ah, up here at Enron.

4 DAVID: Uh huh.

5 RYAN: Hey, I was just talking to the gen guys. I wanted to see if we could shut copper
6 down. They weren't sure if ah, if there were any issues, or, ah [coughs]. Excuse me. Is
7 that something that's ah, that's available to us to do, or?

8 DAVID: Uh, I'm sorry. To do what?

9 RYAN: To shut down Copper.

10 DAVID: Yeah, uh, well, what ha – was happening was, is that, um, uh, the gas
11 marketers gave us so much gas to burn today.

12 RYAN: Uh huh.

13 DAVID: And Copper is only on one gas. You know, we have intra- and inter-gas.
14 And Copper is only on intrastate and we've – we've already pretty much at our limit for
15 intrastate. So, we were – we had talked about shutting down copper, uh, just so we don't
16 burn over on the gas.

17 RYAN: Uh huh.

18 DAVID: Uh, But if we -- we could leave it on and leave it a five megawatts where it's
19 at now, and we would be OK.

20 RYAN: Well actually, I mean, we actually, uh, have too much power right now.

21 DAVID: OK.

22 RYAN: So that's why I was calling -- to see if we could actually shut it down. I know
23 it's only [coughs], it's only a few megawatts, but we're having [coughs] -- excuse me -- um,
24 we're having some problems and we -- we're having a little trouble selling the power.

25 DAVID: OK. Yeah, what, uh, well, normally what you do is you let, uh, the
26 dispatchers know --

27 RYAN: Yeah.

28 DAVID: -- and they'll give a switching order.

29 RYAN: I know they -- I don't know why they sent me over to you, but, uh --

- 1 DAVID: OK, well I'll call 'em and get it.
- 2 RYAN: OK, great.
- 3 DAVID: And we'll go ahead and shut down Copper and, uh, and just go from there.
- 4 That'll help us on the gas.
- 5 RYAN: OK.
- 6 DAVID: OK, great.
- 7 RYAN: Thanks.
- 8 DAVID: Thank you.
- 9 RYAN: Bye.
- 10 DAVID: Bye-bye.
