

**EX. SNO - 300**

1 4-20001208-10554498-10575196 (2:07)

2 [dialing/dialing/ringing]

3 DALE: This is Dale.

4 MIKE: Dale, Mike at Enron.

5 DALE: Yeah, Mike

6 MIKE: Hey, ah, what – Powerex, ah, wants to take that to Bonneville system to BC border.

7 DALE: Will Bonneville allow it?

8 MIKE: Yeah.

9 DALE: [inaudible] too?

10 MIKE: They won't allow the latter, I mean, they won't allow the – the ricochet off COB anyway.

11 DALE: Yeah, right.

12 MIKE: So – ah, Bonneville, I think is the easier one to deal with on [break in recording] but um,

13 yeah, they want to just use Bonneville transmission to go from Bonneville system to BC border,

14 10030. Non-firm. [break] Powerex to BC Hydro and then BC Hydro transmission from BC border

15 to system.

16 DALE: What is that – just a second here. OK, it's gonna be – what's the a – the, ah, oasis number.

17 for the first leg?

18 MIKE: 10030.

19 DALE: OK. And then, ah, supposed to be Enron, Powerex [break] and Powerex – OK, go ahead,

20 from where –

21 MIKE: Um, yeah, after, ah, they get to BC border it goes back to Powerex and then they go to BC

22 Hydro.

23 DALE: OK.

24 MIKE: BC Hydro uses their transmission to go from BC border to – [break]

25 DALE: OK.

26 MIKE: And then BC Hydro will sink there.

27 DALE: is – is there an oasis number for the – ?

28 MIKE: Ah, they didn't give me one for that wheel.

29 DALE: Yeah. Though Powerex has to get a tag, right?

- 1 MIKE: Yeah.
- 2 DALE: So we don't care.
- 3 MIKE: We don't care.
- 4 DALE: All right.
- 5 MIKE: OK.
- 6 DALE: All right, thanks.
- 7 MIKE: No problem.
- 8 DALE: Bye.
- 9 MIKE: Bye.
